Re: U.S. Utility Patent Application
Application No. 10/040,945; Filed: January 9, 2002
For: **Modular Assembly of Antibody Genes, Antibodies Prepared Thereby
and Use**
Inventor: BETTER *et al.*
Our Ref: 0610.005000I/MAC

Sir:

Transmitted herewith for appropriate action are the following documents:

1. First Supplemental Information Disclosure Statement;
2. A listing of the cited documents (AL1- AM7 and AR1-AS55) on form PTO-1449 (55 pages); and
3. Return Postcard.

It is respectfully requested that the attached postcard be stamped with the date of filing of these documents, and that it be returned to our courier. In the event that extensions of time are necessary to prevent abandonment of this patent application, then such extensions of time are hereby petitioned.

Robinson *et al.*

Appl. No. 10/040,945

Filed: January 9, 2002

For: **Modular Assembly of Antibody
Genes, Antibodies Prepared
Thereby and Use**

Confirmation No. 5282

Art Unit: 1642

Examiner: *To be assigned*

Atty. Docket: 0610.005000I/MAC

First Supplemental Information Disclosure Statement

Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

Sir:

Listed on accompanying Form PTO-1449 are documents that may be considered material to the examination of this application, in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.56, 1.97 and 1.98. Copies of these documents were filed in the parent application, US Application No. 09/722,315, filed on November 28, 2000.

Where the publication date of a listed document does not provide a month of publication, the year of publication of the listed document is sufficiently earlier than the effective U.S. filing date and any foreign priority date so that the month of publication is not in issue. Applicants have listed publication dates on the attached PTO-1449 based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

The Examiners's attention is directed to co-pending U.S. Patent Application No. 09/722,425, filed November 28, 2000, which is directed to related technical subject matter. The identification of the U.S. Patent Application is not to be construed as a waiver of

secrecy as to that application now or upon issuance of the present application as a patent. The Examiner is respectfully requested to consider the cited applications and the art cited therein during examination.

In accordance with 37 C.F.R. § 1.98(a)(3), Applicants' undersigned representative submits the following concise explanation of the relevance of the non-English language documents, Document Nos. AL3, AN3, AN5, AO5, and AO6 cited on Form PTO-1449.

Document No. AL3, Patent No. JP 60-155132, is in the Japanese language. This document relates to immunoglobulin production by recombinant host cells. An English language abstract is provided as Document No. AT53.

Document No. AN3, Patent No. JP 61-47500, is in the Japanese language. This document relates to chimeric antibodies and the production thereof. An English language abstract is provided as Document No. AR54.

Document No. AN5, Patent No. JP 62-502586, is in the Japanese language. This document relates to the construction of hybrid genes. An English language abstract is provided as Document No. AS54.

Document No. AO5, Patent No. JP 63-068087, is in the Japanese language. This document relates to a DNA and amino acid sequence that contributes to the expression of pectic acid lyase. An English language abstract is provided as Document No. AT54.

Document No. AO6, Patent No. EP 0 324 162, is in the German language. This document relates to the production of antibodies in bacteria. An English language abstract is provided as Document No. AT55.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith. It is further understood that the Examiner will consider information that had been cited or submitted to the U.S. Patent and Trademark Office in a prior application relied on under 35 U.S.C. § 120. 1138 OG 37, 38 (May 19, 1992).

This First Supplemental Information Disclosure Statement is being filed within three months of the date of filing of a national application. No statement or fee is required.

It is respectfully requested that the Examiner initial and return a copy of the enclosed PTO-1449, and to indicate in the official file wrapper of this patent application that the documents have been considered.

The U.S. Patent and Trademark Office is hereby authorized to charge any fee deficiency, or credit any overpayment, to our Deposit Account No. 19-0036.

Respectfully submitted,

STERNE, KESSLER, GOLDSTEIN & FOX P.L.L.C.
